

ABOUT THE COMPANY . . .

Peak (NASDAQ: PEAK) is an industry leader in engineered plastics and packaging for high value-add products in the semiconductor, medical, laboratory, and consumer markets. With offices in Hong Kong, manufacturing facilities in Shenzhen (PRC), and distribution centers worldwide, Peak brings unprecedented economics together with superior design, tooling and professional services to deliver complete solutions to our customers.

DELIVERING VALUE . . .

Peak delivers high-value, precision packaging and plastics solutions to our customers on time and on budget. We believe in:

- Full design services, quick response and rapid prototyping to support any product designs
- Delivering innovative products and services to market like UltraLite™ and SemiCycle™ to improve our customer's business processes
- Competitive pricing with superior service and delivery

IMPORTANT FACTS . . .

Peak continually reinvests in its business to address current and future customer needs. A few examples of our investments include:

- Multiple quality certifications including: ISO 9001:2000, ISO 14001:2004, ISO 18000:1999 and TS 16949:2002
- More than 1,000 metric tons of molding capacity per month
- JIT centers in over 12 locations around the world
- Full-process services to quickly move designs from concept to production
